

Table of Contents

1	General intro.....	5
2	Danish Policy for the use of livestock manure	5
2.1	Danish support scheme for biogas	6
2.2	Danish market model for trade of biogas.....	8
2.3	Climate considerations	10
2.4	Circular economy.....	10
2.5	The importance for Danish energy supply	10
2.6	Nutrient recycling	10
3	Danish biogas regulations.....	11
3.1	XX.....	11
3.2	XY.....	11
3.3	Summary.....	11
4	Biogas plants.....	11
5	Biogas production.....	11
5.1	Planning for biogas production	13
5.2	Biomass available	13
5.2.1	Manure	13
5.2.2	Residues.....	15
5.2.3	Household waste	15
5.3	Energy content	15
5.4	Masseballance	15
5.5	Logistics	15
5.6	Organization	15
6	The use of biogas.....	16
6.1	The Danish gas network	16
6.2	Danish gas quality standards.....	16
6.3	Upgrading	17
6.4	Power and heat production (CHP).....	18
6.5	Transport	19
6.6	Power2X.....	19
7	The use of digestate	19
7.1	Fertilizer value and recycling	19
7.2	Nutrient content.....	20

Biogas production and use of products

7.3	Value of the nutrient	21
7.4	Application method and ammonia losses	22
8	Reduce the risk of environmental problems	26
8.1.1	Avoid the spread of diseases	28
9	Danish competence	29
9.1	Universities	29
9.1.1	Aarhus University	30
9.1.2	Aalborg University	30
9.1.3	Southern Danish University	31
9.1.4	Roskilde University	31
9.1.5	Technical University of Denmark.....	32
9.2	Knowledge Institutions.....	32
9.2.1	Danish Technological Institut.	32
9.2.2	The Biogas Association	33
9.2.3	SEGES	33
10	Companies, suppliers and advisors	33
